# About us

---

Farmigea history started in 1946 thanks to Antonio Federighi's entrepreneurial perseverance with the setup of a small laboratory for the production of chemicals and cosmetics in the historic center of Pisa. Since the beginning ophthalmology has been an important division of the company that over time has become its only focus. With its experience of more than seventy years and know-how, today Farmigea is a modern company with a state of the art production plant with the highest levels of quality.

# International Sales

---

Farmigea has started its international sales activity since the beginning of its history and nowadays export is a key core business. Farmigea target is to expand its commercial presence outside of the domestic market and to seize the opportunities offered by the globalization of markets. The development of strategic partnerships and trade integration in foreign markets has significantly increased Farmigea exports, reaching 30% of total sales.

A large, abstract splash of teal and green watercolor paint is centered on the page. Within this splash is a white circle containing the text 'PRODUCTS for licensing'.
